-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 30, 31, 33-39, 50-59 and 70-73 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lundquist et al. (US 5395327) further in view of Webster, Jr. (US 5827278). Lundquist et al. disclose a catheter comprising a hollow catheter body (40), a steering center support (350), adhesive material (405), a guide coil (375) and a sleeve (320). Lundquist et al. teach all of the limitations of the claims except the catheter body having a side wall, an aperture extending through a predetermined portion of the side wall and the adhesive material being the same color as the catheter body.

Webster, Jr. discloses a similar device and teaches that it is old and well known in the art to provide an aperture in the side wall of the catheter body to provide a means for inserting adhesive within the catheter to form a glue joint. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide an aperture in the side wall of the Lundquist et al. catheter body to provide a means for inserting the adhesive within the catheter.

To have provided an adhesive material the same color as the catheter body would have been an obvious design choice to one having ordinary skill in the art at the time the invention was made.

Response to Arguments

Applicant's arguments filed 9/8/04 have been fully considered but they are not persuasive. See rejection above.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
